Flying Towards Sustainability with the Mitsubishi JetTowel

Introduction

Problem

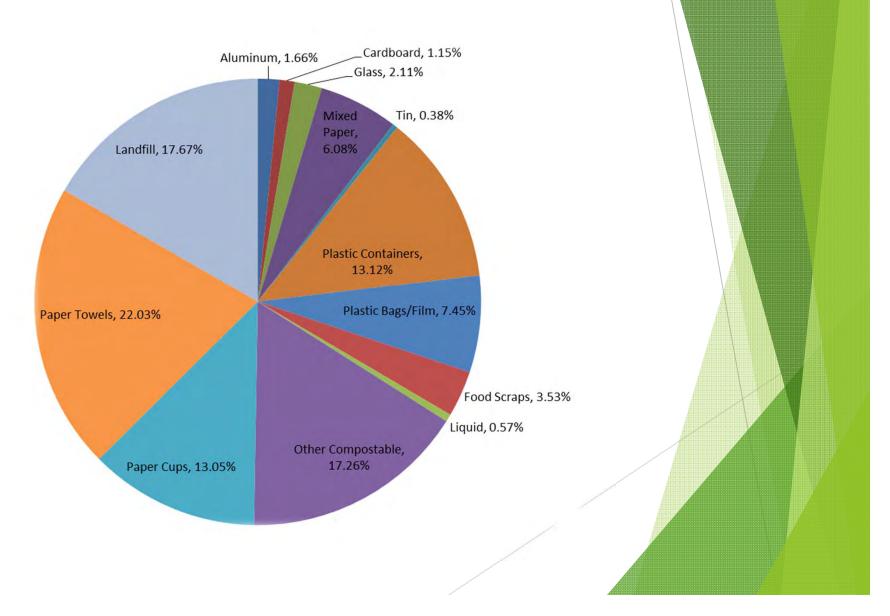

Many buildings on Western's campus produce a large amount of paper towel waste that contributes to WWU's waste stream and carbon footprint.

Solution

Replace the existing paper towel dispensers with highly efficient hand dryers where it is cost-effective.

Waste Audit Data

Overview of Past Pilot Projects

- Paper Towel Composting in Haggard Hall
- Dyson AirBlades in Arntzen Hall Concourse
- Veltia and Mitsubishi hand dryers in Miller Hall

composting on Campus

roblems

- Expensive bags, increased labor, transport costs
- Does not reduce waste stream
- Not feasible on a large scale or in high capacity bathrooms
- uture
- Option for composting in low use bathrooms

"But what about..."

- Hygiene/sanitation
- Opening the bathroom door
- Spill cleanup
- Hand dryer noise
- High upfront cost

Methods

Bathroom Inventory

- Based on paper towel waste by volume and whether or not hand dryers currently exist in bathrooms.
- High/Medium/Low use bathrooms
- Interviews with custodians and stakeholders
- ▶ 5 year implementation plan

Hand Dryer Cost Estimates

Breakdown of Hand Dryer Costs

- 1 unit ~ \$1,300 (retail)
- Rewiring ~ \$1,000
- Installation ~ \$300
- Total: \$2,600/unit
- Electricity Usage Costs (Medium Use - 200 uses/day)
 - ▶ \$0.18/week
 - \$0.75/month
 - ▶ \$9.00/year

Conclusion

- Past pilot projects on campus have provided sufficient information to begin transitioning toward high efficiency hand dryers to reduce overall landfill waste.
- Financial and environmental sustainability.
- Western's responsibility as a leader in sustainability.
