

EOHS

Environmental Outreach Hydration Station

Funded in 2013

A new, innovative student resource funded by the GEF Grant Program. The EOHS will be located in the Wilson Library as a hub for sustainability. Featured will be a fourth water bottle refilling station, an interchangeable event information case highlighting environmental accomplishments at WWU, a touch screen monitor with software provided by the GEF Dashboard team, and an open bookcase exhibiting environmental themes. The EOHS will be a proponent to a better student life, community, and advancing WWU in its emphasis as a sustainable university.
