

WWU

SORTS

Structural Outdoor Refuse Transformation System

Compost

Plastic

Mixed Paper

Landfill

The SORTS pilot project aims to redesign WWU's current outdoor waste system by replacing the 16 stand-alone landfill cans in Red Square with four 4-part sorting stations. Each station will be fitted with visually-appealing educational signage in order to give students, staff and visitors the proper resources to responsibly sort their waste and reduce WWU's environmental impact

2014 Project Lead: Maddie Gavigan Martin

Team Members: Kari Clausen, Jacob de Guzman, Marika Weber

Project Advisors: Gary Hodge (Facilities Management, Grounds Maintenance),
Jill MacIntyre Witt (Physical Education Health & Recreation, Peace Corps)
