

Lyn Okse means **lightning ox** in Norwegian

### DESIGNED

to replace a comparable gas powered pickup truck in most operations

### DEVELOPED

with Facilities Management to suit specific needs of campus grounds keeping

### CONTRIBUTES

to campus-wide goal of sustainability and innovation

**Lyn Okse is a campus designed and built electric utility vehicle that aims to replace a comparable gas-powered pickup truck on campus. As a Vehicle Research Institute senior group project, the Lyn Okse project uniquely blends student development with the needs of campus into one goal.**

## 240 gallons

estimated fuel savings per year compared to a gas powered pickup truck.

## 2132 kg. CO2

tailpipe emissions saved per year compared to a gas powered pickup truck.
